

Tom WOODFORD
Generation Manager – Utility
Guernsey Electricity

I have worked for the power utility on the island of Guernsey for over 25 years, in a range of engineering, projects and management roles. For the past year I have been working as Major Projects Manager, responsible delivery of projects to Guernsey Electricity, including new generating plant and submarine cable interconnectors. I have been a representative to the NESIS group since its inception, and took over as group Chairman in 2011.
