

BEYOND DIGITAL

ON-LINE PEER EXCHANGE IV

15:00-17:00 CET, 29 OCTOBER 2020

The objective of the Beyond Digital Platform is to facilitate the first professional forum within the power sector focused on unlocking the potential of utilising AI and digital technologies and designing a common AI Vision for the power sector in a post-digital age.

The 29 October meeting is aimed at finalising the AI Vision Paper before its publishing on 26 November. We will hear from the EU official responsible for drafting the European AI agenda and will discuss the alignment between policymakers and power industry on the European ecosystem of excellence and trust, as well as data protection, access and ownership.

Moreover, we will agree on the messages that the Beyond Digital Platform experts would like to bring to European policymakers. Eurelectric will present to the membership a draft AI Vision Paper launch plan to maximise the chance of the Vision influencing the EU AI & data strategies. Our aim is to implement a timely and impactful messaging, which all platform members would contribute to and advocate for.

This meeting will be accessible for platform's registered members only and will facilitate a real time exchange between all participants.

29 OCTOBER, THURSDAY

15:00-15:05 | 05 minutes

Today's agenda by Eurelectric

15:05-15:25 | 20 minutes
