

## Power Barometer: How can the EU power sector get Fit for 55?

29 September 2021 – digital event - 11:00-12:00 (CET)

The European power sector is significantly contributing to the decarbonization ambitions of the European economy. The annual Eurelectric Power Barometer presents a data-centric up-to-date analysis of the European power sector's progress towards decarbonisation in 2020 and 2021 as well as an outlook on major trends in the sector in the mid to long term.
