Subject : Decarbonisation Pathways Study

Dear Mr Ristori,

I am pleased to send you the new study “Decarbonisation Pathways”, commissioned by Eurelectric, exploring different long-term decarbonisation pathways.

The study is the first step to follow up on Eurelectric’s new industry vision, which envisages a carbon-neutral power sector well before mid-century as well as accelerated emission reductions in major energy use sectors through progressive electrification.

Our study is intended as a contribution to the debate over a long-term climate and energy strategy for the EU.

I would be delighted to meet and discuss our findings. My PA Annick Erkens will be in touch to explore potential dates for a meeting.

Kind regards

Kristian Ruby
Secretary General
