Subject : "Decarbonisation Pathways" Study

Dear Mr Petriccione,

I would like to congratulate you with the appointment as Director General of DG CLIMA.

I look forward to a constructive cooperation on implementation of the Paris Agreement and ensuring a cost-effective decarbonisation of the European economy.

In attachment, please find a new study commissioned by Eurelectric, exploring different long-term decarbonisation pathways.

The study is the first step to follow up on Eurelectric's new industry vision, which envisages a carbon-neutral power sector well before mid-century as well as accelerated emission reductions in major energy use sectors through progressive electrification.

Our study is intended as a contribution to the debate over a long-term climate and energy strategy for the EU.

I would be delighted to meet and discuss our findings. My team will be in touch to explore potential dates for a meeting.

Kind regards

Kristian Ruby
Secretary General
